Portfolio gallery (thumbnails & captions)					x
Portfolio reflections/description pages					x
Contact page					x
Reflections (description of portfolio pieces)					

Content of reflections appropriate					x
Project images are high quality					x
Spelling and grammar are correct					x

What was your overall first impression of the website?

Everything looks great, and it is obvious how to interact with your website. Some of buttons; though they work, there is nothing indicative that they are in fact clickable, for the example the linkedin and github buttons at the very top of the page (one of the first icons you see) are clickable but when you hover the mouse does not turn to a pointer indicating that you can click these things. I would also say that for all external links have it open to a separate tab as opposed to redirecting within the same tab. Overall everything looks great though!

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

None at all. I would recommend changing the color scheme/theme, having dark on dark can make things difficult to read.

What do you feel are the most effective design elements of this web portfolio?

I really appreciate how everything is centered, responsive and flows in an easily digestible manner, all the buttons work. I would recommend taking another look at the alignment of some of the elements you have throughout your page, they are very small but these buttons I would add a little space and center the text, same with these, we I would try to make these consistent.

What would you suggest be changed with the design or content of this web portfolio?

The hamburger menu on smaller screens does not appear to be working at the moment, and making taking another look at theme with olive green on black, overall looks good!
