Portfolio reflections/description pages			x		
Contact page			x		
Reflections (description of portfolio pieces)					

Content of reflections appropriate				x	
Project images are high quality				x	
Spelling and grammar are correct				x	

What was your overall first impression of the website?

Clean look and straightforward design, a lot of empty space.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

None.

What do you feel are the most effective design elements of this web portfolio?

Consistency with layout elements and navigation scroll.

What would you suggest be changed with the design or content of this web portfolio?

For the hero image, stretch it to be full screen without the side gaps. This would create some more distinctness before jumping into the other sections. I suggest making some separation between each area, like a different shade background for every other section. Also, the contact could use some work. I recommend displaying the email instead of just clicking it to an email. Even consider adding a form for contact submissions. Overall, this is a good start to your portfolio, I would look at adding some more uniqueness that shows who you are as a developer and to branch away from a typical modern layout.
